Discover the Unique Science Behind Seed Dispersal at EcoLab

GENEVA, IL — Do you know how to tell if a plant is a popper? A dropper? Or a plopper? Come learn about the amazing and unique ways that different plants disperse their seeds throughout nature.

Join us for “EcoLab: Science of Seed Dispersal,” on Saturday, Sept. 28, from 9:30-11 a.m. at Creek Bend Nature Center. After we study the various methods of seed transportation, we’ll embark on a hike to see real-life examples of seed dispersal techniques. The program will culminate with each participant creating a craft that demonstrates their chosen seed dispersal approach.

EcoLab is a quarterly, environmental education program that offers children and young adults the opportunity to analyze and learn about the natural world through science-based approach.

This free program is for all ages. Advance registration is required. To register, visit www.kaneforest.com/register, call 630-444-3190 or email programs@kaneforest.com.

Creek Bend Nature Center is located within LeRoy Oakes Forest Preserve at 37W700 Dean St., St. Charles. To view a full roster of Forest Preserve District of Kane County programs, visit www.kaneforest.com and find us on social media by searching @forestpreserve.
