Dive into the World of Microbes at EcoLab: Color-Changing Bacteria

GENEVA, IL — While many of us cringe at the thought of bacteria, these prolific microbes are actually vital components of any ecosystem. Come learn about the wonders of bacteria and their important function in our natural world.

Join us for “EcoLab: Color-changing Bacteria,” on Thursday, April 25, from 7-8 p.m. at Creek Bend Nature Center. During this hands-on program, class members will construct a “color-changing bacteria zoo” to take home for their family. Witness incredible, transformative bacteria right before your eyes!

EcoLab is a quarterly, environmental education program that offers children and young adults the opportunity to analyze and learn about the natural world through a more science-based approach.

This program is for ages 10 and above. The registration fee is \$5/person. Advance registration is required. To register, visit www.kaneforest.com/register, call 630-444-3190 or email programs@kaneforest.com.

Creek Bend Nature Center is located within LeRoy Oakes Forest Preserve at 37W700 Dean St., St. Charles. To view a full roster of Forest Preserve District of Kane County programs, visit www.kaneforest.com and find us on social media by searching @forestpreserve.
