PRESS RELEASE

As part of the Stearns Road Bridge Corridor project, Dunham Road will be realigned and moved west of its current location. To do this construction of new roadway embankment is necessary. Embankment construction will begin on September 1, 2009. Heavy earth moving equipment will be crossing Dunham Road in the vicinity of Stearns Road. Traffic will be interrupted by this equipment and flaggers will be used to control traffic. This is a large operation that is expected to occur for 2 to 3 months. Long delays are expected and motorists are asked to allow extra time in their travels. Use of alternate routes is advised.

The same dirt moving equipment will cross over the Illinois Prairie Path bike trail south of Stearns Road. Flaggers will be on the bike path to control bike traffic as the equipment travels back and forth. Expect long delays on the path during this work.

Questions or concerns may be directed to: Kevin Ahern at 224-535-8161.
